M
MUSKOKA
ROCK COMPANY

Muskoka Rock Company extracts granite block from several proprietary quarries throughout the Muskoka region. The granite is then processed in our state-of-the-art continuous-flow manufacturing facilities.

Muskoka Rock creates stunning products for landscaping, floors, walls, fireplaces, patios, stairways and accent pieces. Granite boulders are cut to specified thickness with the use of a diamond blade or wire saw before moving on to the next stage of production.

CANADIAN SHIELD GRANITE INSIST ON IT

Aesthetically, Muskoka granite has a singular beauty without having a singular look. Your Muskoka granite flooring and your neighbour's can vary widely in their distinction and unique qualities. Ranging from the subdued to the dramatic, every granite piece has its own "fingerprint" based on its quarry.

Unique, durable, beautiful and timeless, Muskoka's Canadian Shield granite has many more uses than just as a countertop material. Architects, designers and homeowners are choosing granite for paths and patios, external cladding, backsplashes, tiles, mantels and stairs.

A quick flip through any contemporary architectural magazine will leave you with little doubt that Muskoka granite is the stone of choice for North America's premier architectural properties and landscapes.

Muskoka granite, inside or outside, gives your living space a seamless, inspired-by-nature look and feel.

It just makes sense to take your inspiration from the local beauty that surrounds you.

Uniquely beautiful

Muskoka granite has a unique geological structure, containing layers of minerals that are different than other granite.

Make the local choice

Perhaps the best part of buying your granite from a local Canadian provider is that it involves no compromises.

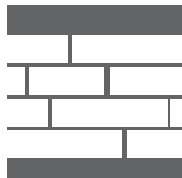

Muskoka granite sourced from different quarries exhibits a wide range of colours and textures, making it easy to get the look you're after and to find the right product to match pre-existing landscaping and other stonework.

- 5-POINT STYLE RANDOM, SAWN AND FLAMED
- 5-POINT STYLE RANDOM, HAND-SPLIT

Randomly shaped stones which, when installed, create a mosaic style. Some installers will cut or chisel each stone into five points to produce a traditional, balanced look.

- RANDOM LENGTH PLANKING, SAWN AND FLAMED

Provided in random lengths, this clean-line style of sawn and flamed flagstone is complementary to modern themes and designs.

- DIMENSIONAL CUT, SAWN AND FLAMED

Granite sawn into square and rectangle shapes is available in a wide variety of bond-patterns to create natural yet contemporary spaces.

Installed as square-cut, planking, or with a natural shape, Muskoka Rock's interior and exterior granite flooring options are unparalleled for their low-maintenance qualities, ease of installation, superior strength and natural appeal.

Richly detailed colours and granite grain patterns, derived from our proprietary Muskoka Rock quarries, make a striking impression while delivering a level of endurance that you can depend on long after your project has been completed.

Muskoka Rock Company's granite makes for a superior flooring option for both commercial and residential applications. Our granite floors are about as tough as they come, while maintaining a natural, delicate appeal.

FINISHING OPTIONS:

Honed, polished, flamed, or sandblasted.

BUILDING STONE & THIN VENEER

SOPHISTICATION, ELEGANCE AND DURABILITY, BOTH INDOOR AND OUTDOOR.

- ASHLAR THIN VENEER
- ASHLAR BUILDING STONE

Rectangular-shaped coursing stones that produce an eye-pleasing, linear effect. Muskoka Rock Veneer and Building Stone are available in edge-grain or split-face styles.

- 5-POINT STYLE RANDOM THIN VENEER
- 5-POINT STYLE FULL BED

Randomly shaped stones which, when installed, create a mosaic style. Some masons will cut or chisel each stone into five points to produce a traditional, balanced look.

- SILLS, CAPS AND COPING

Natural stone sills, caps and other design accents are used in conjunction with vertical wall-stones of all styles.

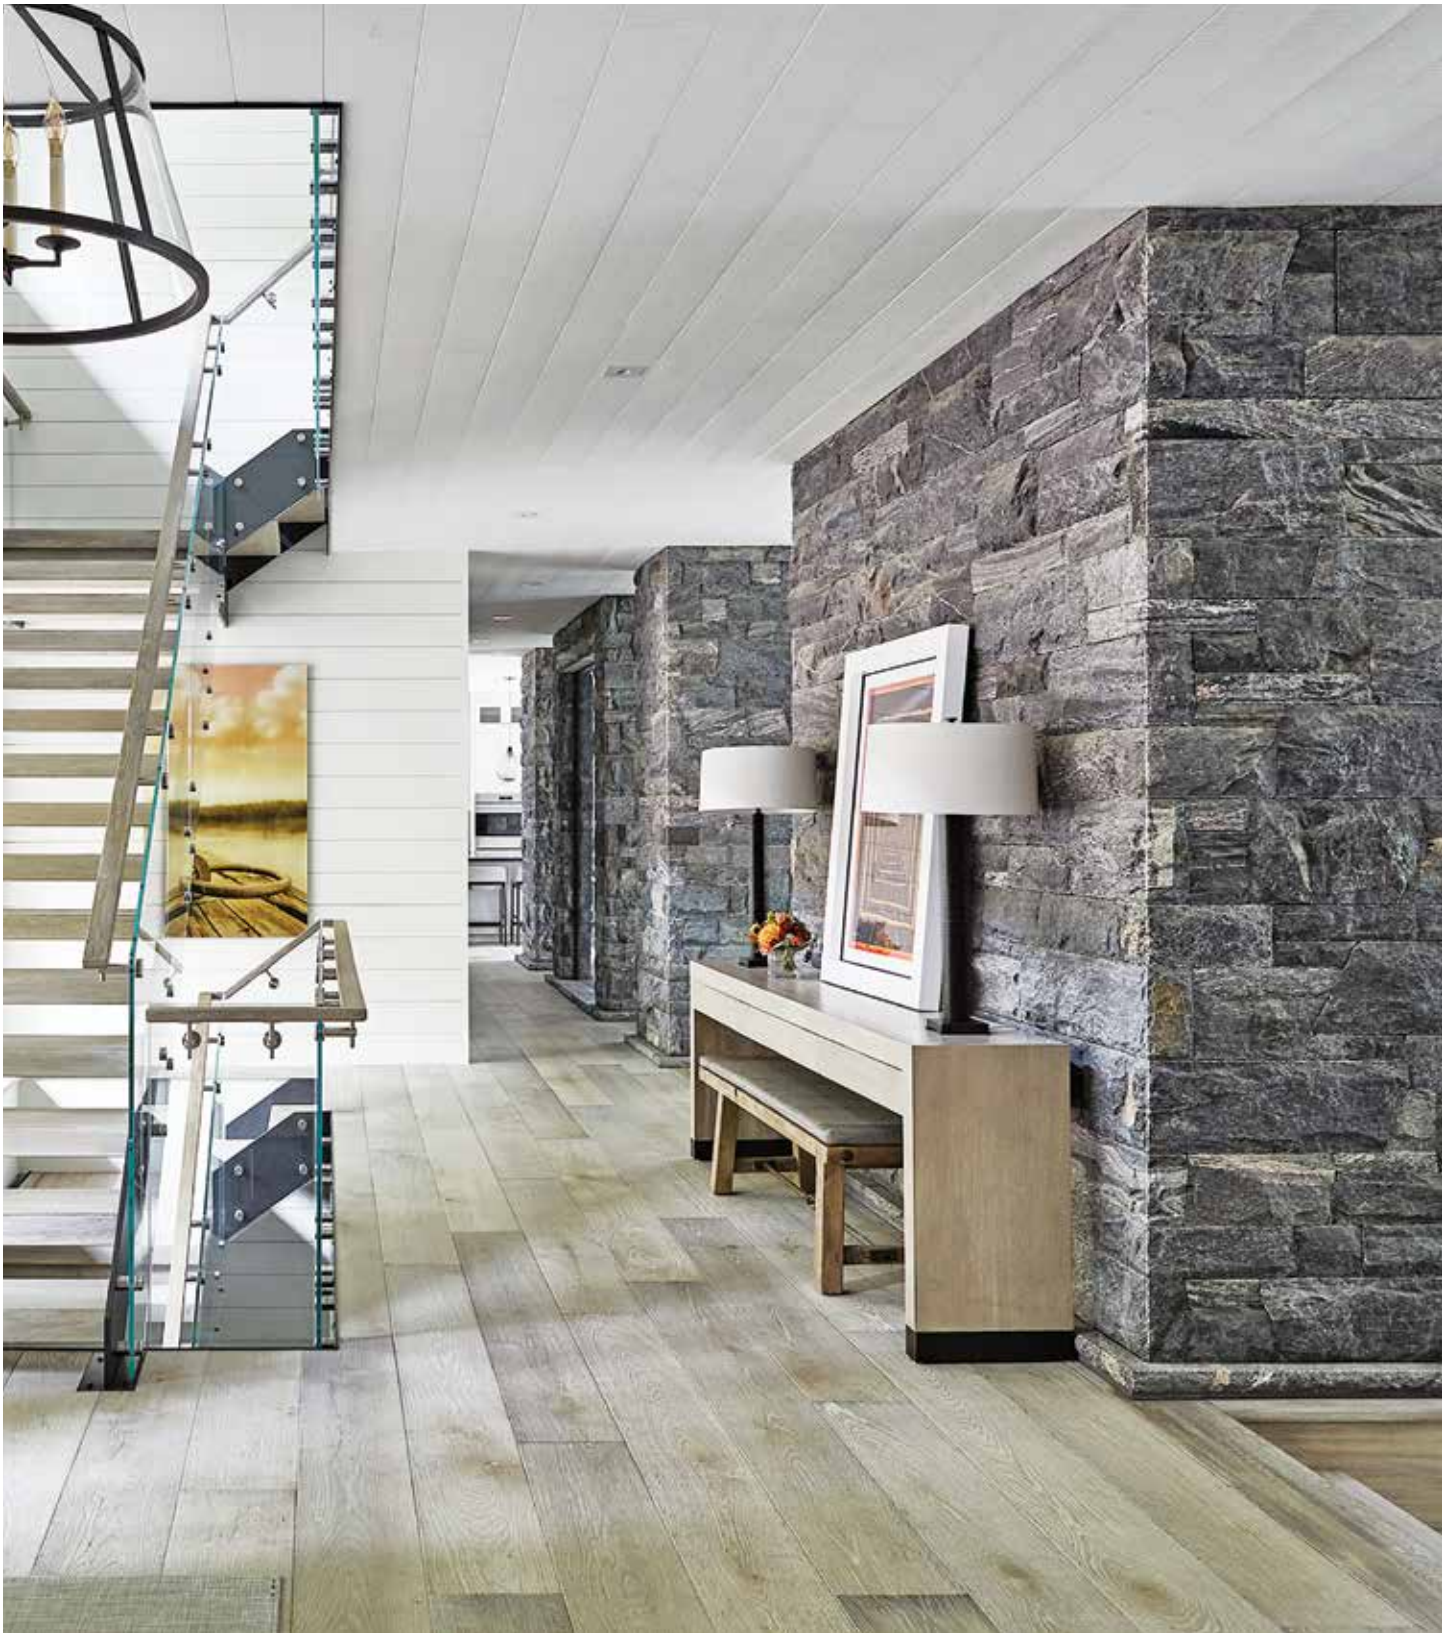

- MANTELS AND HEARTHES

In many cases, natural stone hearths, mantels and other design accents are required or specified in conjunction with fireplace stone cladding.

Create a lasting impression with Muskoka Rock Company's selection of Building Stone and Thin Veneer products.

Unsurpassed in durability and uniqueness, Muskoka Rock's Granite Building Stone and Thin Veneer captures the imagination and inspires new design and architecture for both residential and commercial properties.

FLAGSTONE

SAFETY AND STABILITY NEVER LOOKED SO GOOD.

VARIED THICKNESSES AVAILABLE, INDIVIDUAL PIECES UP TO 50 SQ. FT.

- RANDOM, SAWN AND FLAMED
- RANDOM, HAND-SPLIT

Randomly shaped stones which, when installed, create a mosaic style. Landscapers can adjust joint styles and shapes on site to suit the vision of the project.

- WALKWAY - RANDOM, SAWN AND FLAMED
- WALKWAY - RANDOM, HAND-SPLIT

Natural walkways in a sawn or hand-split flagstone create distinctive connections between the outdoor living areas of your property.

- DIMENSIONAL CUT, SAWN AND FLAMED
- DIMENSIONAL, HAND-SPLIT

Granite sawn into square and rectangular shapes. Installed in a number of bond patterns to create a granite tile which, when installed, creates a natural yet contemporary look.

When it comes to granite flagstone, the possibilities are endless. A beautiful stone patio or pathway gives you more reason to enjoy your outdoor living spaces.

A patio can serve as an extension of your home or cottage so that when you step outside you are immediately in your outdoor living space. Patios create separate destinations or gathering points on your property.

Anyone who has ever carried trays of food and drinks is well aware of the challenges of uneven patio stones or deteriorating decking. Muskoka Rock Flagstone is an excellent choice for predictable surface uniformity, stability and traction.

MUSKOKA
ROCK COMPANY

STAIR TREADS

STEP UP TO CLASS, SAFETY & DURABILITY

STANDARD 7" RISE - AVAILABLE IN 2' - 12' LENGTHS

- **SAW CUT TREAD - NATURAL FACE**

The most popular version of the Muskoka Rock stair tread is a "Natural Face." This style has an irregular moving front and back step edge that fits best with the surrounding natural rock features. The Natural Face style is the best way to keep your elevation transitions as nature intended.

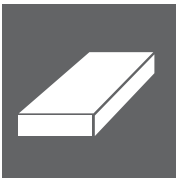

- **SAW CUT TREAD - SAWN FACE**

For more contemporary cottage/home designs, commercial applications, and for those that want a more refined look, a "Sawn Face" stair tread is available. This step boasts a very clean and manicured front-face edge with a natural (normally unseen) back face. This style is often used for grand entrances.

- **SAWN ALL SIDES**

Often used in formal applications in which both the front and back tread faces must be uniform. This style features fully dimensional precise saw cuts on all faces and sides. This format is often used in applications in which all sides of the stone would be visible or in cases where the back face of the stair tread meets a finished deck or foundation.

- **NATURAL HAND-SPLIT TREADS**

Hand-split stone represents the history of our quarries. Though not common practice these days, we offer hand-split stair treads to those who want to add to their existing landscape. If you need to match hand-split products in order to maintain continuity with your existing treads, we will be glad to accommodate.

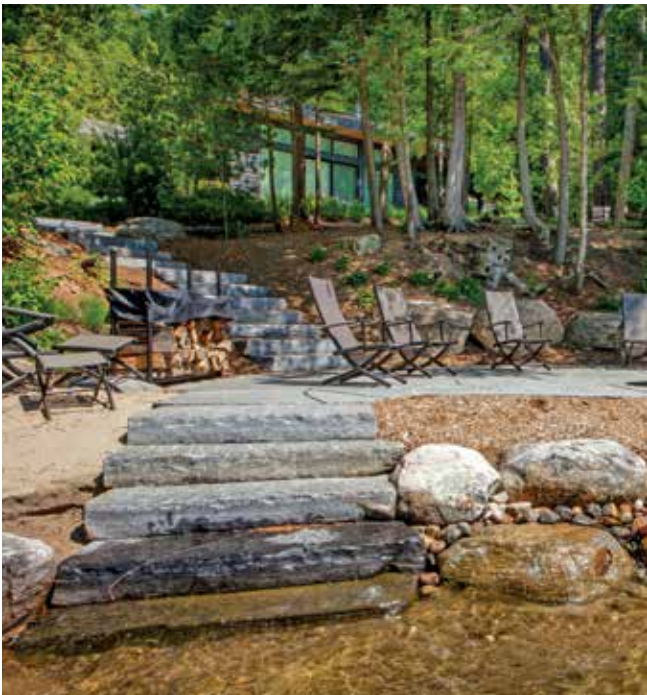

Whether it's a low-rise tread to adjoin two patio surfaces or a standard tread-height staircase to provide waterfront access, Muskoka Rock Company's granite stair treads provide consistency and safety while offering unmatched natural appeal and durability.

Granite stairs are in increasing demand because of their attractiveness and durability. Further, our standard-height cut treads provide an additional level of comfort. Most of us are on "auto-pilot" when using stairs, with our brains assuming that our feet will find steps of the same height. A shorter or taller "surprise step" can be a hazard, causing a trip or a fall.

After our diamond-saw process, flaring creates flat stair treads that are easily installed for a natural-looking, level surface. These smooth surfaces provide an ideal base for foot traffic.

ORIGINAL MUSKOKA

Earthy hues of muted peaches and soft grey tonal values lend to a traditional Muskoka look.

MUSKOKA GREY

Smokey grey tones contrasted throughout with subtly feathered accents of white and pink shades.

ROSSEAU

A uniquely undefined grain structure characterized by black, grey, and rose tones.

A deep appreciation for the distinct textures, grains and pigments of stone is very much alive at Muskoka Rock. As part of the Canadian Shield, Muskoka enjoys the rich bounty left by the glaciers millions of years ago. Because stone is carved from the earth, it varies widely in colour and texture. Muskoka Rock uses proprietary local quarries, each one supplying granite of a different character, allowing our clients to select the stone that pleases their tastes and suits their décor for patios, floors, walls, steps and special features.

Nature's simplicity is the ultimate sophistication.
